MBT-1 Testimonials

"We appreciate very much the chance to see and discuss your remarkable Mobile Barrier product. You are saving lives." *Dr. Robert Bosler, UC Davis*

"I just wanted to let you know that we took the Mobile Barrier Trailer out last night on a pot hole project on south bound I-25. It worked great, the guys felt safe and secure, it lit up the work zone like day light, the VMS board we had in the radar mode and it slowed people down even more... it is a great piece of equipment, money being well spent." *Mr. Jeff Tatkenhorst, Ops Colorado Department of Transportation/R4*

"Your idea is so incredibly sensible my immediate reaction is 'Why haven't we been doing it that way all along?' Congratulations on quality execution of a 1st class idea." *Mr. Richard Sarchet, P.E. Colorado Department of Transportation/Research*

"Good luck with selling this to every state in the nation, we can really use it." *Dr. Jake Kononov, P.E., Ph.D., Director of Research & Development, Colorado Department of Transportation*

"The MBT is a semi-rigid vertical wall with relatively low friction characteristics that can be favorably compared to vertical concrete barrier walls that passed prior full-scale testing." *MBT-1 FHWA Acceptance Letter*
